

## Joining a Skype Meeting from an invite as a Guest

1. If you have the facility to use a camera and/or microphone and speakers on your pc, click on the **Try Skype Web App** from the invite you have received.

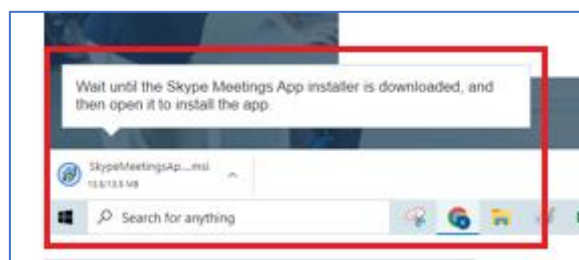

2. The link can only be used in **Google Chrome** or **Microsoft Edge**, therefore if the link has opened in IE you will need to copy the link (URL) and paste it into either Chrome or Edge.

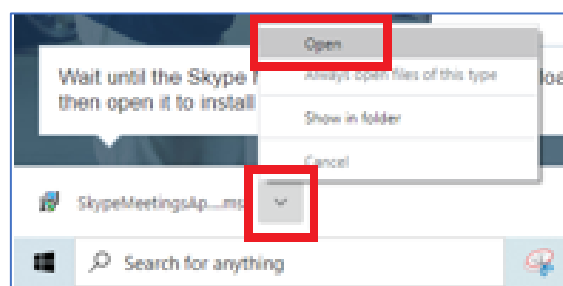

Once the page opens you should see the two options shown below, click the first option **Install and join with Skype Meetings App (Web)**

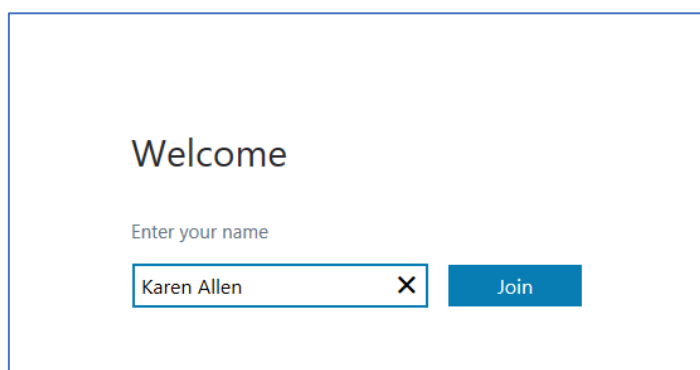

3. The app will start to download onto the pc as shown below:

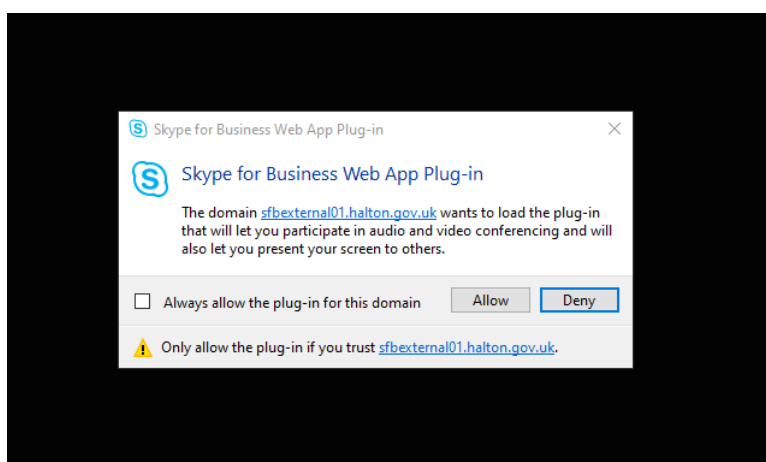

4. When the download has finished, click on the up arrow and click Open.

5. You will see a Welcome screen, where you will enter your Guest name. Click **Join**.

6. You may see a Plug-In warning appear depending on the settings on your pc, if so, click **Allow**.

7. Your meeting should now start.
