

# Become a Governor of your local hospitals

## What does a Governor do?

Governors are elected by the Trust members and provide a vital link between the hospital and local communities

They establish ways of discussing developments and significant services provided by the Trust with members and other partnership organisations

They help to develop ideas about how the Trust can provide services reflecting the needs of patients in the wider community

Governors listen and understand the views of Trust members and the public and raise them when necessary

They make sure that the Board and the Non-Executive Directors are delivering the Trust's goals
