

Ningbo Beilun Xinqi Middle School

1. Introduction

Ningbo Beilun Xinqi Middle School was founded in 2018. With 5-year development, there are 1661 students and 124 teachers. The student age is 12-16 years old (Year 7 – Year 9).

With the mission of “innovative educational approach, systematic school management, distinct educational philosophy, excellent teaching and learning, fostering a high level of satisfaction and happiness among both teachers and students, high parent satisfaction, and strong social recognition”, the school has achieved various honors, including civilized campus, Zhejiang Province standardized schools for compulsory education, Zhejiang health-promoting school (Bronze award), one of comprehensive pilot programme for Zhejiang smart schools, one of STEM Education and Project-Based Learning Base Schools in Zhejiang, one of the fourth batch of provincial precision teaching project experimental schools in Zhejiang, one of smart campuses in Ningbo, one of 5A safe and secure campus.

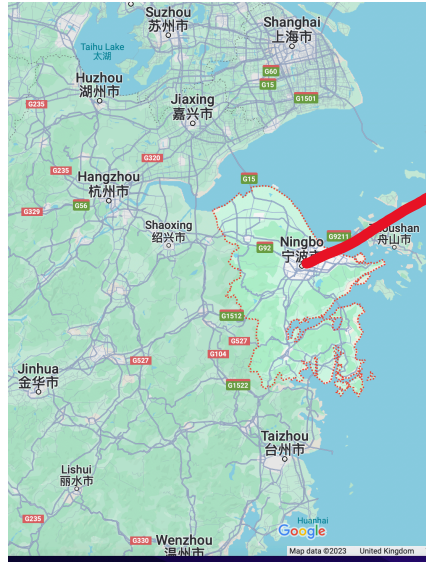

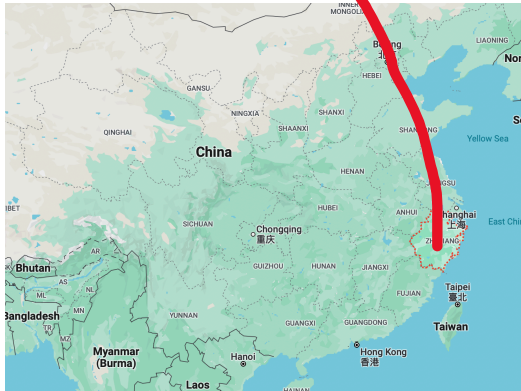

2. Location

Ningbo Beilun is a district located in the northeastern part of Ningbo City, Zhejiang Province, China. As a coastal area, Beilun is recognized for its strategic port, one of the largest and busiest in China, playing a pivotal role in the country's international trade. The district boasts a blend of urban development and natural landscapes, with a picturesque coastline and modern infrastructure.

Culturally, Beilun reflects a harmonious mix of tradition and progress. With a history dating back centuries, the district showcases historical sites and cultural heritage amidst its rapidly growing urban environment. The local culture is influenced by maritime traditions, and events often celebrate the city's nautical history.

Economically, Beilun has undergone significant development, driven by its robust port activities and industrial sectors. The district is a hub for manufacturing, logistics, and trade, contributing substantially to the economic prosperity of Ningbo and the broader region. In recent years, efforts to promote innovation and technological advancement have further diversified the economic landscape.
